The screenshot shows the Microsoft Learn course page for "Microsoft Power Platform Functional Consultant". The page has a green header with the course title and navigation links like "Crumbs" and "TOC". Below the header, there's a "Training" section with various links. The main content area features a large image of a glowing red cube on a blue grid. To the left of the image, the course title "Microsoft Power Platform Functional Consultant" is displayed, along with the course ID "PL-200T00-A" and a button to "Get started with self-directed learning". To the right of the image, there's a sidebar with a "Contents" section listing topics like "Get started using Dataverse", "Manage permissions and administration for Dataverse", "Visualize, import, and export Microsoft Dataverse data", and "Create relationships, business rules, calculations".

Tims Git for Course Navigator

- download - unzip it - load as browser extension

[mrtimd/ms-course-navigator: # MS Course Navigator A browser extension that enhances Microsoft Learn with a persistent sidebar TOC, progress tracking, and resume navigation. ## Features - !\[\]\(339a16584d5da0f0a3ca4e9ec17bf6a1_img.jpg\) Dynamic Table of Contents \(TOC\) sidebar - !\[\]\(e06a1d39938b2f5d7a2c3618fea4f77f_img.jpg\) Module completion tracking \(Summary-based\) - !\[\]\(23ac9e28f2600a1e787d149d7f76716a_img.jpg\) Resume where you left off - !\[\]\(ba1ec627dd10668218bdb3f2bf103f06_img.jpg\) Learning path awareness and navigation](#)

When browser has MS Course link loaded it knows what to do... build book TOC

- If you click any area up to Summary a Green Checkbox shows in TOC.

Built with [React Tutorial](#) W3Schools Freebie

Power BI Desktop – Download, Model, Report

Get Data, Model it, use relationships to PK/FK join table & has a filter setting SQL does not. (Tableau is not Microsoft tool does same stuff)

1. Download Free Power BI Desktop (you need this)
 - a. [Download Microsoft Power BI Desktop from Official Microsoft Download Center](#)
2. GitHub has instructions & All Files if needed.
 - a. [MicrosoftLearning/PL-300-Microsoft-Power-BI-Data-Analyst](#)
 - b. **Download [07-Solution-Sales Analysis.pbix](#)
 - c. To see the Goal of these labs & to play with a running report.

Short Intro

3. [Get started with Power BI Desktop - Power BI | Microsoft Learn](#)

Nomenclature Division

4. [Course PL-300T00-A: Design and manage analytics solutions using Power BI - Training | Microsoft Learn](#)
5. This course is meant to be OFFLINE/Free on local PC to some degree

You can Setup Local Sandbox & have latest SQL server but not required to do labs.

6. Uses AdventureWorksDW database file for lab 1 imports.
 - a. This can be setup in a separate download & install of free SQL Developer Edition & download RESTORE database file.

Setup Local Sandbox SQL – Not required but Not Bad

Free Microsoft Downloads for Developer Standard or Enterprise

1. [SQL Server Downloads | Microsoft](#) (2025 is current)
 - a. Run & Install SSMS - Yes
2. [AdventureWorks Sample Databases - SQL Server | Microsoft Learn](#)
3. Download version, follow RESTORE instructions

Power Automate (extra stuff – not data)

Automating CRUD Ops around the Network so to speak. Needs Microsoft Subscriptions usually but check any Course link marked Exercise to be sure.

1. End to End Lab – Good read to understand user steps like a Power Builder type thing
 - a. [Create a canvas app that can trigger a Power Automate flow - Power Apps | Microsoft Learn](#)
2. [Course PL-200T00--A: Microsoft Power Platform Functional Consultant - Training | Microsoft Learn](#)
3. [GitHub - MicrosoftLearning/PL-200-Power-Platform-Functional-Consultant: PL-200 Power Platform Functional Consultant](#)

Portals to Automate Stuff

These need subscription to use:

- Power Apps maker portal <https://make.powerapps.com>
- Power Platform admin center <https://admin.powerplatform.microsoft.com>

PowerBuilder Notes

PowerBuilder is an integrated development environment (IDE) originally created by Sybase and now owned and developed by **Appeon**.

It is primarily used for building data-driven business and enterprise applications, standing out for its rapid application development, intuitive object-oriented language (**PowerScript**), and its powerful, built-in **DataWindow** technology. [1]

Modern versions of the platform, such as **PowerBuilder 2025 R2**, bring robust capabilities for the cloud, supporting Windows deployments, n-tier architectures, and automated REST API generation. [1]

Core Features & Capabilities

- **DataWindow Technology:** This is PowerBuilder's most distinctive feature. It is a highly versatile object used to seamlessly connect, retrieve, manipulate, and present data from various databases (like SQL Server, Oracle, and PostgreSQL). [1, 2, 3, 4]
- **Event-Driven Architecture:** Applications are heavily event-driven; developers write scripts triggered by specific user interactions (like clicking a button or modifying a text box). [1]
- **Modern UI/UX:** The latest editions include codeless UI enhancements such as Ribbon-style menus, dynamic DPI resizing for high-definition screens, and SVG image support to keep legacy applications looking sleek and modern. [1]
- **Cloud & Web Deployment:** With integrations like **PowerServer** and **PowerClient**, older on-premise client/server projects can be effortlessly recompiled and deployed for the cloud. [1, 2]
- **Upgraded Development Environment:** PowerBuilder features an ultra-fast, multi-threaded compiler and a revamped IDE that includes tabbed code editors, Git source control, and a solution-based structure. [1, 2, 3]

How to Get Started

Developers can evaluate the platform and take training courses to learn modern PowerScript development directly through the official [Appeon PowerBuilder](#) site. [1]

For an overview of how the modernized Integrated Development Environment (IDE) boosts productivity and streamlines the coding and compilation process:

Freebie Places that R Cool

1. [Introduction to NoSQL - GeeksforGeeks](#)
 - a. NoSQL uses JSON vs Tables like SQL
2. W3Schools – can run examples on the site free. Very Cool
 - a. [HTML Forms](#) just one example
- 3.
